

**CLAIM AMENDMENTS**

Please amend claim 1, as follows, wherein underling indicates additions:

1. (Currently Amended) A collapsible table comprising:  
a frame formed from a plurality of pivotally connected frame members, the frame being movable between an expanded configuration and a collapsed configuration;  
a table top connected to the frame, the table top including at least one drink holder;  
a container assembly having a flange portion provided with mounting holes, and a container pouch, the flange extending from the container pouch toward and encompassing the mounting holes,  
whereby the container assembly is connected to the frame at a position beneath the table top by the plurality of frame members being inserted though the mounting holes.
2. (Original) The collapsible table of claim 1 in combination with a bowl, the table top further comprising an opening sized and shaped to receive the bowl.
3. (Original) The collapsible table of claim 1, wherein the table top and the container assembly are fabricated from flexible materials allowing the table top and the container assembly to flexibly collapse with the frame as the frame is moved between the expanded configuration and the collapsed configuration.
4. (Original) The collapsible table of claim 3 wherein the table top is fabricated from a fabric material.
5. (Original) The collapsible table of claim 1, wherein each of the plurality of frame members is pivotally connected at a first end to a first joint and at a second end to a second joint and at a point intermediate the first and second ends to an other frame member at a third joint.

6. (Original) The collapsible table of claim 5, wherein the frame further comprises a plurality of corner straps, each corner strap being vertically connected between the first joint and the second joint.

7. (Original) The collapsible table of claim 6, wherein the corner straps are adjustable in length and capable of being tightened.

8. (Original) The collapsible table of claim 1, further comprising a table top umbrella hole and a container assembly flange umbrella hole.

9. (Original) The collapsible table of claim 8 in combination with an umbrella having a support pole, wherein the support pole is inserted and retained within the table top umbrella hole and the container assembly flange umbrella hole.

10. (Original) The collapsible table of claim 1, further comprising at least one pocket.

11. (Original) The collapsible table of claim 10, wherein the at least one pocket is attached along at least one edge of the table top.

12. (Original) The collapsible table of claim 1, wherein the table top is releasably connectable to the frame.

13. (Original) The collapsible table of claim 12, the frame further comprising protruding a plurality of pins and the table top further comprising a plurality of grommets, wherein engagement of the grommets with the pins releasably connects the table top to the frame.

14. (Original) The collapsible table of claim 1, wherein the table top is fixedly attached to the frame.

15. (Original) The collapsible table of claim 1, wherein the container pouch is insulated.

16. (Original) The collapsible table of claim 1, wherein the frame members are fabricated from a rigid material.

17. (Original) The collapsible table of claim 16, wherein the rigid material is steel, aluminum or alloys thereof.
